Benefits

- ♥ Stay warm all winter
- ♥ Save money on energy
- ♥ Avoid nuisance breakdowns
- ♥ Schedule it and forget it
- ♥ Qualified, experienced technicians

Of course you can call and schedule your appointment also! Ask for Bill.

Just a friendly reminder that the heating season is coming fast and your boiler system needs annual maintenance. Ensuring your system is in good shape for the winter is imperative to your comfort and will save you money on your energy bill. ***Our pre-season special this year will remain at \$150.00, tax included.***

Our regular price for this level of service would be from \$214.50 - \$322.68 per boiler.

It has been suggested that we appear to charge more for our fall special than some of our competitors do. Please be aware that we offer a full boiler servicing including operation and safety verifications, include the most common parts at no additional charge and include sales tax. We average 1.5 – 2.5 hours per service, including travel. Our “competitors” are simply offering to “check” several items, will spend less than an hour doing so and are mainly looking for repair items they can charge for. There is no adequate comparison between what we provide and our ‘competitors’ offer. It’s an apple to oranges comparison.

To help keep costs to a minimum and keep this special pricing available, we ask that you pay for this service by check, cash or credit card **BEFORE THE TECHNICIAN LEAVES YOUR HOUSE.** He will need to note the payment details on his work order.

Call to schedule your appointment, 509-922-1717 and ask for Bill.

You can also email me your preferred day and time, I will check the availability and reply with a confirmation. Please include your name and address.
